

Install postgresql

```
192.168.56.102 - PuTTY
ubuntu@sdnhubvm:~[19:02]$ sudo apt install postgresql
```

Create user and database

```
192.168.56.102 - PuTTY
ubuntu@sdnhubvm:~[18:56]$ sudo -u postgres createuser ubuntu
ubuntu@sdnhubvm:~[18:56]$ sudo -u postgres createdb ubuntu
ubuntu@sdnhubvm:~[18:57]$ sudo -u postgres psql
psql (9.3.20)
Type "help" for help.

postgres=# \q
ubuntu@sdnhubvm:~[18:58]$ psql ubuntu
psql (9.3.20)
Type "help" for help.
```

Run a simple query

```
192.168.56.102 - PuTTY
ubuntu=> SELECT * FROM pg_catalog.pg_tables;
      schemaname      |      tablename      | tab
leowner | tablespace | hasindexes | hasrules | has
triggers
-----+-----+-----+-----+-----
